

Kevin Ressegaire

JavaScript Web Developer – Frontend & Backend (TypeScript, Node.js)

JavaScript web developer focused on both frontend and backend, specialized in building end-to-end web applications with React, TypeScript and Node.js.

Hands-on experience with REST API creation, server-side logic and responsive user interfaces. Used to working in agile teams, with Git/GitHub workflows and writing maintainable, well-documented code.

Motivated to join a development team and contribute to production-ready products while continuously improving skills.
